Price: **€27.00** gross

Manufacturer: Klemp

Referention number: LAM-22X90-PL010

Information:

The modern wall panels with an elegant look represent the latest trends in design and architecture and add a stylish "finishing touch" to any room. They are perfect as partitions for living spaces, allowing the kitchen, dining area or living area to be visually separated. They can also be used as room dividers for commercial spaces, such as offices, practice rooms, hotels, bars or restaurants, where they provide an atmospheric ambience, the necessary discretion and modern decoration. The freestanding wall panelling is made of robust MDF board and is covered with an abrasion-resistant wood-look veneer. The hard-wearing materials ensure long-lasting use and also offer excellent acoustic properties. The wooden slats can be used in many different ways. They offer unique, versatile decoration possibilities and can be used as vertical and horizontal partitions. Their ease of use is further enhanced by the simple, non-invasive installation, which is carried out without drilling or hammering using a special adhesive and does not require too much skill.
