Referention number: AT-AK251-200

Information:

A square aluminum profile, 25x25x1,5 mm and 200 cm long, is a durable and lightweight structural component made from high-quality 6063 aluminum alloy. The 1,5 mm wall thickness ensures stability and longevity, making it ideal for building frames, cages, and lightweight aluminum constructions. The raw surface allows for easy processing and precise fitting of components. The light weight (0.95 kg) does not add unnecessary load to the structure, and the square cross-section guarantees easy and solid connections with standard plastic connectors. An excellent choice for projects requiring strength and stability. It ensures fast and trouble-free assembly.
