Price: **€28.00** gross

Manufacturer: Klemp

Referention number: MD213

Information:

The MD213 curtain rail is a decorative element designed to conceal the curtain rod, and it is compatible with LED lighting integration. Its gently curved profile features decorative milling and is made from PolyForce material, which is resistant to moisture and UV radiation—ensuring it won't yellow, warp, or chip. The LightGuard® technology prevents light from penetrating the surface, providing even diffusion. A special coating allows for easy painting with water-based paints. Installation is done with mounting adhesive, requiring no specialized tools.

Product features

Material	PolyForce
Length	200 cm
