Price: **€120.00** gross

Manufacturer: Klemp

Referention number: QL035

Information:

The QL035 curtain rail is designed to conceal curtain systems in the window area. Made from PolyForce material with increased density, it offers resistance to mechanical damage and moisture. The integrated LightGuard® technology allows for the installation of LED strips without light bleed-through, resulting in even diffusion and soft backlighting. The dimensions of the rail are 240 x 12 x 4 cm, making it easy to fit various recesses; the material is easy to cut and simple to install using mounting adhesive. The surface is coated with a protective layer that reduces dust accumulation, and cleaning is easy with a dry cloth.

Product features

Material	PolyForce
Length	240 cm
Width	12 cm
Collection	Listwy karniszowe
Depth	4 cm
Colour	White
Waterproof	Tak
