6,12x2,09x2m	€2,526.00

Information:

The CleanBase catio is an aluminium structure that is both sturdy and lightweight. It is designed for year-round outdoor use. Thanks to the bottom composite strip used, maintaining cleanliness is very simple. The robust netting made of galvanised or stainless steel (INOX) effectively prevents cats from escaping. The modular system allows you to easily enlarge the catio if needed. This prefabricated catio is perfect for your home, garden, balcony or terrace. It's an excellent solution for cat owners looking for a safe enclosure for their pets.
