Information:

The SkyView aviary for parrots and other birds is a lightweight yet robust aluminium structure, designed for year-round use. The robust galvanised or stainless steel (INOX) net provides effective protection and prevents birds from escaping. It's perfect for those who would rather mount the structure on natural surfaces or an existing foundation. The modular design of the aviary allows for easy expansion. It is a great solution for breeders and owners of small and large birds alike.

Product features

Total height	2 m
Material	Aluminium
Purpose of the construction	For the birds
Mounting method	Easy installation with screws
Frame profile	20x20x1,5 mm
Mesh type	Galvanized
Bottom guard	No
Grid size	Esafort 12,7x12,7x1,05; Esafort 19x19x1,45 Esafort; 19x19x2,05; 40x40x3mm
