Price: **€0.00** gross

Manufacturer: Klemp

Referention number: KLEMP-WAL-KONF

Information:

A sturdy frame for mounting advertising banners on building facades, made to any size – just provide the length and width before adding it to your cart.

The structure is made of Ø42 mm aluminum tubes and galvanized cast iron fittings, designed for self-assembly with an Allen key. By default, the banner is mounted approximately 5 cm from the wall, but if needed, we can prepare a version with a 5–20 cm offset, allowing you to bypass elements such as window sills, gutters, or alarm sirens.

Additionally, you can order a complete set with a frontlit banner and tensioners, which will keep it properly stretched without creases. LED floodlights on brackets are also available, selected according to the size of your banner to ensure even illumination of its entire surface.

All product options can be configured below.
