Referention number: AT-AK252-200

Information:

An aluminum square profile 25x25x1.5 mm, 200 cm long, made from 6063 aluminum alloy, is a lightweight and robust component for lightweight aluminum constructions. A wall thickness of 1.5 mm provides good stability while keeping the weight low—ideal for frames, cages, and racks. The raw surface makes it easy to adjust and install with standard plastic connectors. The square cross-section ensures precise and durable joints between structural elements. The profile is resistant to deformation and guarantees long-lasting use. Excellent for projects requiring both strength and lightness.
