Information:

Flat Spruce Cover Strip - Discreet and Aesthetic Finish

High-quality solid spruce molding designed for the aesthetic masking of gaps, joints, and minor imperfections. The smooth sanded surface with rounded edges provides a subtle look and safety, while a constant moisture level of 10-12% guarantees its durability.

This A/B grade wood strip is perfect as a cover for window and door recesses, as well as a subtle finish for wall and ceiling panels. Raw wood is ready for painting, varnishing, or staining, allowing for a perfect match with the color of walls, furniture, or frames.

Product features
